

RADIANT SITE MANAGER

built for petroleum and convenience retailing

Store managers are faced with a number of complex challenges: from managing employees to providing outstanding customer service to driving profitability. These demands create a complicated operating environment. Increased competition and demanding customers make it increasingly difficult to closely manage site operations while building the business. Radiant provides innovative and effective tools to increase operational efficiencies.

Radiant Site Manager (RSM) allows your store manager to efficiently oversee day-to-day tasks while freeing them from the back office. Built from over fifteen years experience serving petroleum and convenience retail operators, the RSM is an easy-to-use solution that delivers powerful information at the manager's fingertips.

ACCESS RADIANT SITE MANAGER FROM EITHER THE POS OR THE BACK OFFICE PC

BETTER CONTROL OPERATING COSTS

Detailed real-time reports track key operational metrics including cash management, employee accountability, fuel inventory and store performance. Provide store personnel intelligence to proactively identify and manage issues before losses mount.

IMPROVE CUSTOMER SERVICE

Move the store manager out of the back office and on to the store floor. Access a full range of functionality at any POS terminal to provide instant store analysis.

REDUCE MANAGER TRAINING TIME

Automated workflows and an intuitive user interface dramatically cut store manager training time and reduce costly errors. Traditionally time intensive tasks, such as end of day reconciliation, can be accomplished within minutes.

SCALABLE FOR ALL OPERATORS

Single-site operators can manage all POS configuration and maintenance locally. Open system framework enables integration with existing inventory management and central applications for multi-site operators. Tight integration with Radiant POS provides rock-solid cash drawer controls.
